DEFENCE

DEFENCE

EN

The **RLOG** is the French army's multi-purpose trailer. It is **easy to use, adaptable and robust**, and is particularly designed to transport ISO 20' containers and flatracks.

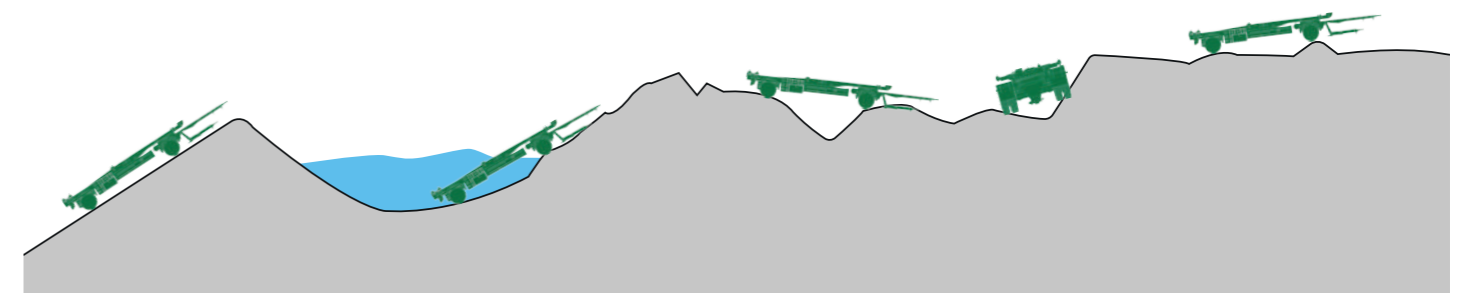

It has two axles with hydraulic suspension, including a fifth wheel with an articulated drawbar. It can be loaded/unloaded using:

- the hydraulic arm of the vehicle to which it is coupled,
- external systems (bridge cranes, cranes and forklift trucks).

It has equipment and fittings guaranteeing the **safety** of the operators and equipment when travelling and during transfer operations. The system has been designed to **reduce and simplify handling** as much as possible.

The RLOG can be airlifted and is a basic contributor to all operations conducted by the French armed forces.

## Technical characteristics

Slope      Fording **700 mm**      Trench      Side slope      Step

- Tow eye: OTAN type D76
- Pneumatic braking system
- Electricity : 24 V
- 2 axles
- GVWR: 20 t
- Pneumatic suspension
