VBP

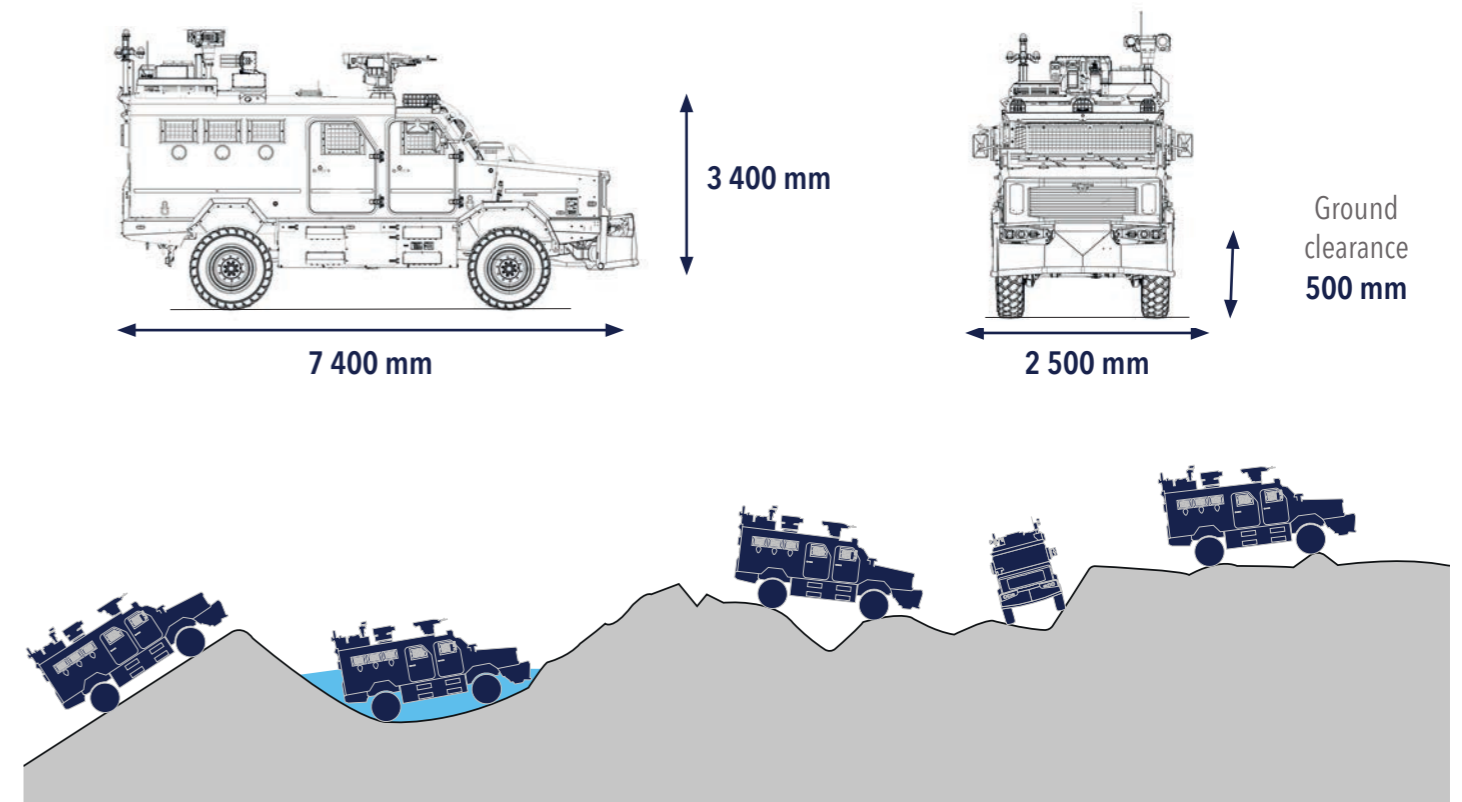

Multipurpose Armoured Vehicle

SECURITY

Technical characteristics

Slope	Fording	Trench	Side Slope	Step
40 % with front blade 60 % without front blade	600 mm	900 mm	30 %	400 mm

With attacks against the police forces unfortunately becoming ever more violent, the vehicles they use for interventions must be **reliable, robust, dissuasive without appearing aggressive, modular, powerful, fast, spacious and comfortable for longer operations, and have easy access.**

With almost **2,000 vehicles** in service, this vehicle is specially adapted to **law enforcement and crowd control** under difficult conditions, taking into account the terrorist threat and terrorism methods in particular.

The **VBP** was designed to meet these needs.

This armoured vehicle protects its occupants and is designed to drive on **congested or damaged roads.**

The **VBP** is a high-mobility 4x4 vehicle which can transport a team **from 10 to 12 people.**

The **VBP** is spacious, enabling the integration of various equipment to monitor and **assess** the situation or for **investigation.**

It also allows the deployment of all the systems of a **forward command post.**

Protection: level 2

Engine: 240 kW (330 hp)
